

## **Due Friday. Create a computer of the future.**

Design a new computer that has all the four main parts of a computer system (input, output, memory, processor). Your computer can be as functional or as outrageous as you want.

- Your new computer must have a name.
- Your advertisement must include a drawing of your computer.
- You must LABEL all the parts of the system. Explain why your new computer system is so much better than what is in use today.
- You must also describe your computer in the form of an advertisement - minimum 50 words. A person reading your ad should have a really good idea how the new parts of the computer system work and what makes them so special.
- No larger than 8.5 x 11 inches (regular paper, white paper). Your information may be typed, but it is not required. Use legible handwriting or printing if not typing your information. No clip art, please.

If you have any questions, send an email from schoolnotes . Right now I am not able to access my esud mail, but it will be email.
